Curing Paint... It's What We Do.

Lab Facility

BGK Finishing Systems lab is equipped to demonstrate various standard BGK systems, including infrared and/or ultra-violet curing ovens and a variety of material-handling equipment. All processes are configured with the equipment necessary to simulate the customer's specific application.

As a leader in the industry, BGK continually develops and tests new curing methods, materials and equipment. We thoroughly test, demonstrate and evaluate electric infrared and ultra-violet curing applications to assure that they meet exacting performance criteria. When new materials and processes emerge, BGK responds with systems that increase manufacturing productivity and efficiency across a variety of industries. As a result, you'll have confidence even before the sale that our equipment will meet or exceed your expectations.

Testing with your parts, your coating, and our equipment to give you total confidence that the equipment you invest in meets your performance requirements.
